It is time now for students seeking awakening into higher dimensions of consciousness to undertake what is perhaps the most important piece of transformational work ever: *moving whatever remains of your old, third-dimensional worldview into the fourth and fifth dimensions—and beyond*. This crucial work involves, amongst other things, integrating whatever pieces remain of your old, *secular* awareness and allowing yourself to shift completely into recognizing that *everything is sacred in its nature*—and that means *everything within creation*—rather than being mentally, emotionally and physically wedded to the perception that there is such a thing as a secular life. We must now grasp that actually everything is sacred. When we allow this truth to register in our consciousness, we begin our ascension into higher dimensions of consciousness!

To make these changes you will need to:

- Clear and let go of the old, patriarchal mindset with its hierarchical, dualistic view of life

- Move into the sacred state of Equality
- Trust your Self more completely
- Live more in a state of empathy
- Practice living more completely and fearlessly in a sacred state of consciousness.

However, the most critical piece preventing us from doing the above is also one of the most difficult things to grasp and work with. It is: *the way you view money and how you use it in the third dimension!* Change your view of money, and you shift your life into a higher dimension. Holding onto the old way of perceiving and working with money can be the most debilitating thing to your health and wellbeing!

Unraveling your old ideas about money is mostly connected to how the third dimension teaches us to use money in a secular *and thus very limited way*. In the third dimension we don't actually understand that money *belongs to* the sacred realms—and that its true function is to serve us in a higher-dimensional way.

So many seekers who have developed wonderfully in a myriad of ways and have already partially ascended into higher dimensions, are being held back by this one remaining thing—the issue of money held in the secular realms. Money is so powerful that it keeps itself and you in a stranglehold *and almost completely locked into the secular world*. It is the one issue that seems to be the most “left behind” in regard to our forward evolution. It blocks us from *fully embracing and inhabiting* the higher-dimensional worlds.

Money is the most overlooked issue on the agenda of spiritual transformation, which leaves us all stuck in the old, third-dimensional paradigm—a world that no longer supports us. In this intensive we will endeavor to process and clear the third-dimensional issues in consciousness that limit us and block us from living a higher-dimensional life, especially those issues preventing real abundance, financial freedom and flow.

We have talked about money over the years in a variety of ways, but the subject is really up in our so-called “real-world” collective consciousness at this current, extremely pivotal time. It is something very important to address in our individual lives. So now let's take it all the way into the sacred world.

Here are some related topics we will address in the intensive:

- How the ego fears its death
- How the body fears its death
- How the issue of survival impacts our financial life as well as our spiritual development
- How money issues can block our enlightenment
- How enlightenment allows us to know our sacred place on Earth
- How enlightenment opens us to a world of abundance, flow and beauty.

Here is some of what you will receive from this intensive:

- An initiation into seeing the whole world as sacred, including money
- Guided meditations that support your opening to the flow of authentic abundance

- Tools and processes that help unplug you from the old, patriarchal paradigm
- An opportunity to release fears and limitations that block your spiritual development
- An energetic initiation into samadhi, a state of unity consciousness and a precursor to enlightenment.
